## SKILLS

**JavaScript, Typescript, Node.js**, Server Side Rendering, Webpack, **React**, Redux, Vue, **React Native**, MySQL, SQLite, Mongo DB, **Linux**, Go, Continuous Integration, Jenkins, NGINX, **Docker, Kubernetes**.

## EXPERIENCE

### [Delivery Hero SE](#), **Berlin - Germany** - *Senior Software Engineer - Logistics*

April 2021 - January 2023

- Worked on the frontend dashboard application for managers to manage all of the rider's information, contracts, documents, absences, shifts...etc.
- Pairing and mentoring other members of the frontend team, providing guidance and technical support for them to complete their required tasks.
- Collaborating with Product Managers, Backend developers, Designers, and other stakeholders to make sure that features implementation meets business requirements.
- Occasionally taking full ownership of a new feature/requirement across Frontend and Backend and doing the necessary changes to Java/Kotlin/Spring services owned by the team.

### [Basharsoft](#), **Egypt** - *Frontend Tech Lead*

December 2017 - March 2021

- Leading and managing frontend development across 2 products ([Wuzzuf](#) & [Forasna](#)). Together with a team of 10+ engineers, We have successfully passed through many cutting edges and challenging projects like transitioning a legacy project into a Single Page Application (SPA) through a major product revamp/rewrite, building a design system, server-side rendering implementation, updating infrastructure and project setup to achieve faster deployments and releases, better development experience and easier onboarding, a react-native mobile application. Alongside serving product and business needs.
- Alignment with other team leaders from other functions and upper management regarding the product scope, putting both short and long-term roadmaps for technical development for both Wuzzuf and Forasna.
- Providing continuous guiding and technical mentorship for team members through code reviews, pair programming, and regular learning sessions.
- Responsible for managing the hiring process for my team and conducting technical interviews. Responsible for increasing the team size from 4 to 12 engineers and still growing.

## **Basharsoft, Egypt** - *Senior Frontend Web Developer*

December 2015 - November 2017

- Developing and implementing the frontend of the new complex and data-rich features for 2 large-scale SAAS products Wuzzuf & Forasna.
- Maintaining & modernizing a huge legacy codebase. Bug fixing and refactoring along with introducing new technologies & tools to the stack.
- Mentoring other members of the frontend team on Learning JavaScript and the latest technologies and tooling for modern frontend web development.
- Collaborating with Product Managers, Backend developers, Designers, and other stakeholders to make sure that features implementation meets business requirements.
- Evaluating and putting direction for using new technologies for our new set of modern applications for company products.

## **Hive Advertising, Egypt** - *Fullstack web developer*

March 2013 - July 2015

- Started as the sole developer building websites for clients and businesses, expanding to a team of four web developers and a mobile development team. Many web projects were executed and deployed during this time for major brands and businesses, including some of the best-known in the region, like BMW Middle East, Huawei Middle East, and Toyota KSA. Maintained a direct relationship with all web projects in Hive's portfolio during this period, as well as solely responsible for developing and deploying many of them.

## **Egyptian Armed Forces, Egypt** - *Soldier*

January 2012 - March 2013

- Obligatory military service.

## **EDUCATION**

### **Helwan University, Cairo** - *Bachelor of Applied Arts in Printing, Publishing & Packaging*

July 2006 - July 2011

Fields of study: Graphic Design, Art, Art History, Design for Print and Web, Paper and inks manufacturing, Printing & Packaging machines, and Printing and Packaging Engineering.
